| 1. The title is clearly stated, the authors are properly credentialled, the article is recent, and it is relevant to nursing. | _Meets Expectations(1-5)_  
<em>The title is clearly stated, the authors are properly credentialled, the article is recent, and it is relevant to nursing.</em>  
_Do not meet Expectations(0)_  
<em>The title may not be clearly stated, the authors may be questionable, the article may be older than 5 years, or it may not be relevant to nursing.</em> |
|                                                                        |                                                                                       |
| 2. Students understand the research. They can evaluate the statistical methods. They can identify when the conclusion does not match the analysis. They can identify flaws in logic, or generalizations. | _Exceeds Expectations(13-15)_  
<em>Student shows deep understanding of the research. They can evaluate the statistical methods and explain why they were appropriate. They can identify when the conclusion does not match the analysis. They can identify flaws in logic, or generalizations.</em>  
_Meets Expectations(10-12)_  
<em>Student shows good understanding of the research but may have a few misconceptions. They can evaluate the statistical methods but are not clear on what the choices may have been and why a method was used. They can identify when the conclusion does not match the analysis. They can identify flaws</em>  
_Do not meet Expectations(0-9)_ |
