

TrueOutcomes Taskforce Meeting
TPOC
Thursday, October 9, 2008
3:00 pm

Attendees:

Mrs. Charlene Stubberfield, Dr. Mary Hawkins, Dr. Edward Mason, Tenika Axel, Dr. Barry Pelphrey

Strategies are changing; we have a little time to fix this. Learning outcomes, rubrics are in good shape. The reporting side is where we are having problems. Some issues are wording are wrong, just small things. Rubrics are well-written.

RUBRICS:

Course prefix, course number
Name of assignments

The ultimate issue- having no standard syllabus for courses. Department heads were to place faculty in groups to assign one artifact for each course. Instructors DO NOT have the authority to add/delete an artifact. This is a perfect time for adjuncts to have a set syllabus.

CUIN need to work toward syllabi

Mason- I think every syllabus should have a title of the course assessment.

PORTFOLIO STATUS: Where are the departments on this?

Educational Leadership- done

HUPF- getting there

CNSL- done

ADMN- no representative, shifting too late/ hopefully we'll take care of this next week.

CUIN- only dealing CUIN courses at this time

OTHER INFORMATION:

We have to redirect them to the department expert. Each department has someone who is responsible for assisting other faculty members. Login issues, Stubberfield can handle but other question it's too late for her to go back.

Mrs. Stubblefield- Dr. Freeman is scheduled to see me on Monday 2pm-4pm.

HUPF- has scheduled to come in tomorrow, and then they will let me know who is missing. HUPF are doing good, they have caught up and past the other departments.

For disposition assessments we can meet on Tuesday, October 14th, 8am-3pm. It will be here in the Hobart Taylor building if the lab in the New Science building is not available.

Meetings are held every Thursday at 3pm-5pm
