Federal Career Intern Program (FCIP) Opportunity
with Internal Revenue Service

The Large and Mid-Size Business Division (LMSB) of Internal Revenue Service is hiring recent graduates for Engineer positions under the Federal Career Intern Program (FCIP). Though called an “internship”, this is a full-time employment opportunity. Upon successful completion of the FCIP, an intern will be eligible for permanent placement within the Internal Revenue Service.

Are you:
- A recent graduate (or will graduate by June, 2010) with a Master in Engineering OR a Master of Business Administration with an undergraduate degree in Engineering?
- Interested in working in the area of business valuations?
- Willing to work in Austin, TX or Houston, TX
- A U.S. citizen?
- Eager to pursue a career in federal tax administration, where you will receive training and experience working with large, complex, tax examinations involving major corporations, estates and other business structures?

If you are interested in receiving further consideration, you must take the following action:
- complete the attached questionnaire
- prepare an up-to-date copy of your resume
- obtain transcripts for ALL college-level work (Unofficial copies are acceptable at this time; official transcripts will be required if you are offered employment.)
- obtain a copy of your DD-214 (if applicable, for veterans)

Submit all of the above items to: LMSB.FCIP.QUES@IRS.GOV

PLEASE PLACE IN THE SUBJECT LINE OF YOUR E-MAIL “Last Name, First Name FCIP ENG INTERN”.

YOU MUST SUBMIT YOUR RESUME AND QUESTIONNAIRE TO THE ABOVE E-MAIL ADDRESS. It is strongly recommended that you submit all documents via e-mail. (If the files are large, it is acceptable to submit them in several e-mails.) However, if you are unable to electronically submit your transcripts, and/or DD-214, you may fax or postal mail them to one of the following. DO NOT SUBMIT your resume or completed questionnaire via fax or postal mail. They will not be accepted.

For transcripts or DD-214 only:
Via fax to: 215-516-1070 (Attention: Colleen Fox)
Via mail – sending “overnight” is strongly recommended to:
IRS – Philadelphia Personnel Office
11601 Roosevelt Blvd
DP-B-5704
Philadelphia, PA 19154
Attention: Colleen Fox
Only those people who submit a resume, the completed questionnaire, and transcripts will receive further consideration for this opportunity.

All inquiries regarding the receipt of your application should be forwarded to the e-mail address where you submitted your application LMSB.FCIP.QUES@IRS.GOV

The IRS Engineering Program contains specialists with academic backgrounds in engineering, science, or accounting. These employees assist the Internal Revenue Agents (professional accountants) with the examinations of individual, business, and corporate tax returns to determine correct federal tax liabilities. Agents conduct examinations relating to compliance with requirements mandated by the Internal Revenue Code. Engineers assist the agents with technical issues, industry specific issues, or valuation and appraisal issues.

Agents and engineers who work in LMSB are responsible for administering the tax examinations of the largest corporations in the world. They may work on teams or individually, coordinating examinations of multinational and national corporations, and other complex entities. They frequently deal with corporations on the most complex tax issues. These may include tax shelters, mergers and acquisitions, global operations, transfer pricing, and more. LMSB Internal Revenue Agents work closely with their customers, often dealing with the senior levels of corporate tax departments and/or their representatives. They face new challenges everyday, both in research and development of issues, and in communications with taxpayers.

Interns will work closely with senior engineers and will be assigned many of the tasks performed by other engineers. Interns will receive classroom and on-the-job training as part of the internship program.

In 2010 IRS will be hiring Engineers in Austin, TX and Houston, TX. The Engineers will be hired at the GS-09. At the end of the first year, with successful work performance within this program, Engineer interns will be promoted to the GS-11. Upon successful completion of the two-year FCIP, interns will be eligible for conversion to permanent placement, as well as be eligible to compete for other promotions.

If you have questions about this career opportunity, you may contact your IRS recruiter OR contact Lynn Youngblood at: Lynn.Youngblood@irs.gov
