REQUIREMENTS FOR CIVIL ENGINEERING AS A MINOR FIELD

Students have two options for the Civil Engineering Minor. Option 1: Civil Engineering and Option 2: Environmental Engineering. Student can use a maximum of 9 hours from their major towards the minor requirements.

**Option 1: Civil Engineering**

Students must complete 18 SCH to satisfy the minor requirements.

- Required courses, 9 SCH:
  - CVEG 2043 - Engineering Mechanics I
  - CVEG 2053 - Engineering Mechanics II
  - CVEG 2063 - Mechanics of Materials I
- Technical Electives, 9 SCH:
  - Approved 3000 and 4000 level CVEG courses.

**Option 2: Environmental Engineering Concentration**

Students must complete 18 SCH to satisfy the minor requirements.

- Required courses, 9 SCH:
  - MCEG 2013 Thermodynamics I or CHEG 2043 Chemical Engineering Thermodynamics I or equivalent
  - CVEG 3043 Environmental Engineering
  - CVEG 4043 Environmental Engineering Design
- Technical Electives, 9 SCH:
  - CVEG 4223 Waste Management
  - CVEG 4233 Water Quality Management
  - CVEG 4243 Fundamentals of Air Pollution and Control

*Other related electives with the approval of the Academic Advisor.*

MASTER OF SCIENCE IN ENGINEERING DEGREE PROGRAM

The Master of Science in Engineering Degree is a general engineering program with four areas of concentration:

- Chemical Engineering
- Civil Engineering
- Environmental Engineering
- Mechanical Engineering

The Civil Engineering and the Environmental Engineering concentrations are administered through the Department of Civil and environmental Engineering. The student must specify the concentration in the graduate school application.

ADMISSION

The following are university admission requirements to the master’s programs in the College of Engineering. Students will be awarded graduate degree status admission if they satisfy all the admission requirements.
1) Meet the requirements for admission to the graduate school.
2) Have an undergraduate degree from an ABET (or equivalent) accredited program.
3) Have a cumulative Grade Point Average (GPA) of 3.00 on a 4.00 scale.
4) Have GRE verbal and quantitative scores in the higher percentiles.
5) Have previous educational background in the intended area of study.

Students may be awarded provisional graduate degree status admission if they satisfy the following requirements.

1) Have a minimum cumulative Grade Point Average (GPA) of 2.75 on a 4.00 scale.
2) Have GRE verbal and quantitative scores in upper percentiles.

Provisional students must petition the Dean of Engineering for full status to the graduate program during the term in which the first 12 graduate semester credit hours will be completed. To be considered for full degree status provisionally students must have earned a minimum GPA of 3.0 in all courses recommended by the faculty advisor and the head of the graduate program.

Students may be awarded non-degree status admission or special student status admission if they satisfy the requirements as outlined in the catalog section “Types of Admission” under Admissions Information and Requirements. Special students must petition the Dean of Engineering for full status to the graduate program during the term in which the first 12 graduate semester credit hours will be completed. To be considered for full degree status, special students must have earned a minimum GPA of 3.0 and have GRE verbal and quantitative scores in upper percentiles.

**CURRICULUM**

Each area of concentration in the Master of Science in Engineering (MSE) degree program has an option of a thesis or non-thesis degree plan. The thesis option requires 30 semester credit hours including 6 semester credit hours for the thesis. The non-thesis option requires 33 semester credit hours including 3 semester hours for a major project. Each option includes 12 semester credit hours of graduate courses in general engineering with the remaining hours to be determined by the student and his academic advisor during the first semester of acceptance to the graduate program as a degree status student.

During the first semester of graduate degree status, the student should select an advisory committee consisting of at least three members, two of whom must come from the engineering faculty, and the chairman of the committee who shall be a full member of the graduate faculty in engineering.
Thesis Option Degree Program Requirements

General Requirements ................................................................. 6 SCH
GNEG 5086 Thesis

*General Engineering Requirements ........................................ 12 SCH
GNEG 5063 Engineering Analysis I
GNEG 5073 Engineering Analysis II
GNEG 5033 Engineering Probability and Statistics
GNEG 5133 Numerical Methods in Engineering
GNEG 5023 Operations Research
GNEG 5193 Special Topics

Technical Electives ...................................................................... 12 SCH
Selection based on consent of student’s academic advisor.

Total Degree Requirements .................................................... 30 SCH
* The student must consult his/her academic advisor and take at least two courses in GNEG 5063, 5073, 5033, 5133 or 5023.

Non-Thesis Option Degree Program Requirements

General Requirements ................................................................. 3 SCH
GNEG 5303 Graduate Project or
GNEG 5203 Graduate Internship

*General Engineering Requirements ........................................ 12 SCH
GNEG 5063 Engineering Analysis I
GNEG 5073 Engineering Analysis II
GNEG 5033 Engineering Probability and Statistics
GNEG 5133 Numerical Methods in Engineering
GNEG 5023 Operations Research
GNEG 5193 Special Topics

Technical Electives ...................................................................... 18 SCH
Selection based on consent of student’s academic advisor.

Total Degree Requirements .................................................... 33 SCH
* The student must consult his/her academic advisor and take at least two courses in GNEG 5063, 5073, 5033, 5133 or 5023.
