Course Goals and Overview

Through the ages and across culture, novice in many crafts, arts, and science have sought to expand and cultivate their knowledge by serving as apprentices to seasoned practitioners. Such arrangements allow teaching to be tailored to the needs of the individual, so learning is maximized. The relationships are mutually beneficial and represent a unique method of instruction that contributes to the continuity of the entire field of work. In counseling, the notion of fieldwork is valued as a means of providing students a laboratory in which to practice skills and integrate theoretical concepts. Students function alongside staff members, accessing practical information as they begin to develop their own identity as professionals. The supervisor-intern relationship is at the center of the practicum experience.

Practicum students must become acclimated to the practicum setting. There are rules and regulations to learn, operational policies to digest, and hierarchical matrices to comprehend. Remember that although you may not select the person who will be your supervisor, you can significantly influence the quality and content of the supervision you receive. Before meeting with your supervisor, or very early in the process, think about specific goals that you have for the practicum. Ask your supervisor about the range of activities available for you to explore, and do not be afraid to use some creativity in constructing the learning plan. Many supervisors are busy professionals who will welcome your input. Keep in mind that the entire internship experience is dependent on you taking an active rather than a passive stance as a learner.

Ethical guidelines exist to protect the well-being of client, practitioners, and the professional, as a practicum student, it is incumbent upon you to be well versed in principles established by ACA and within your work setting.

E-FOLD-P

The conceptual framework model, the Educator as Facilitator of Learning for Diverse Population (E-Fold-P), supports the major goals of the teacher education unit. (E-FOLD-P) guides the design and implementation of the teacher education programs located in the College of Education. This conceptual framework constitutes a commitment by the unit to develop and prepared candidates:

- As a problem solvers, critical thinker, and decision maker;
- As reflective and a continual learner who utilize effective teaching practices;
- As facilitators of student growth and development, by precept and examples; and
- As educators with understanding and appreciation of human diversity and global awareness.

E-Fold-P also represents The Unit’s dedication to the preparation of candidates who are technologically literate themselves and who can integrate technology into the learning environments of their students.

McKinney-Vento Act (Federal Law) 2011
The McKinney-Vento program for Pre-K–16 is authorized under Title VII-B of the McKinney-Vento Homeless Assistance Act (42 USC 11431 et seq.). The program was originally authorized in 1987 and, most recently, reauthorized by the No Child Left Behind Act of 2001.

The program is designed to address the problems that homeless children and youth have faced in enrolling, attending, and succeeding in school. Under this program, State educational agencies must ensure that each homeless child and youth has equal access to the same free, appropriate public education, including a public preschool education, as other children and youth. Homeless children and youth should have access to the educational and other services that they need to enable them to meet the same challenging State student academic achievement standards to which all students are held. In addition, homeless students may not be separated from the mainstream school environment. States, school districts, colleges and universities are required to review and undertake steps to revise laws, regulations, practices, or policies that may act as a barrier to the enrollment, attendance, or success in school of homeless children and youth.

OBJECTIVES

The objectives of supervised practicum are to enable the student-counselor to:

1. Gain insight and experience from real "on the job training"
