Check the facts before you snack
For a healthier you, use the Nutrition Facts label on packaged foods to make smart food choices quickly and easily. Try these tips:

- Keep these low: saturated fats, trans fats, cholesterol and sodium.
- Get enough of these: potassium, fiber, vitamins A and C, calcium and iron.
- Use the percent daily value (PDV) column when possible: five percent or less is low, 20 PDV or more is high.
- Check servings and calories: Look at the serving size and how many servings you are actually consuming. If you double the servings you eat, you must double the calories and nutrients, including the PDVs.
