The Sustainable Forestry African American Land Retention (SFLR) Program helps forestland owners manage their forestland for maximum production. It also helps educate landowners about ways to retain land in families and avoid heirs' property issues. Our goal is to help Texas landowners avoid heirs' property and land retention issues and understand the value of properly managing forestland.

## **Mission**

The Sustainable Forestry African American Land Retention Program (SFLR) project mission is to provide African American landowners with the resources and support required to resolve heirs' property issues and sustainable forestry education and technical assistance in forestland management in East Texas.

# **Values**

- Sustain forest ecosystem
- Enhance long-tern multiple socioeconomic benefits
- Maintain legal, institutional, and economic framework for African American Land Retention
- Maintain forest health and biodiversity
- Improve forestland stewardship

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marrial status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).
