Summer 2021
Undergraduate Remote Research Program

This program offers an engaging research experience, professional development opportunities, research communication workshops, and an expanded perspective on graduate school and a career in science.

**Important Dates and Location**
Applications are due February 15, 2021. The remote 9-week program runs June 7 - August 6, 2021.

**Research Experience**
You will be paired with researchers on the Urban Watershed Evolution Project, to focus on the impacts of urbanization and climate change on watersheds.

**Eligibility and Support**
Undergraduates at Texas colleges and universities may participate. All participants receive a $3,800 stipend.
