Subject: Spring 2022 Order of the Engineer Inductees

Good morning,

I am extremely late in sending this email. We inducted 28 faculty, staff, and students into the Order of the Engineer on May 3rd, 2022. Since the Order is multidisciplinary, I asked NSBE to takeover as lead for all future ceremonies. For our students, the requirement is the completion of an Ethics courses such as Global Development Issues with Dr. Ahmed, the new Engineering Ethics in a Global Society course (formerly Ethics and Conduct of Engineers), Ethics, or Ethics in Computing. Students must be within 1 year of graduation and headed into the engineering profession upon graduation to qualify. Thank you to Dean Obiomon for providing funds for the facility, food, and membership supplies for the Ceremony. The parents were very proud of their students!
