

# MITRE's Cyber New Professionals Program

Congratulations! You're starting your career in cybersecurity! Do you want solve problems to ensure a safer world? How will you stay on the cutting edge of technology? Where do you want to expand your knowledge? In what capability areas would you like to explore?

How you design your career experiences will be key in enabling you to solve the world's hardest cybersecurity problems.

**MITRE's mission is to build a safer world:** At MITRE, we are a not-for-profit dedicated to keeping the world safe in the public interest. We protect our nation's critical infrastructure, national security systems, and organizations against advanced cyber threats. Our Cyber New Professionals department is designed for those that want to solve difficult cognitive problems while advancing their careers.

To truly master this field you need a team of people to collaborate with. This team needs to consist of people who will mentor you and those that go on the journey of mastery with you.

## Why is the MITRE Cyber New Professionals Program a good place to start your career?

As part of making a difference, one needs to experience multiple facets of the field. Solving different kinds of problems for different government agencies (DoD, NIST, Judiciary, FAA and CMS; to name a few) will help you understand how your solutions fit in context. This will give you the breadth of experience that will fuel your talent in cybersecurity.

In your role within MITRE's Cybersecurity New Professionals program, you will:

- Rotate through projects working with multiple government agencies on a diverse set of cybersecurity problems.
- Take classes in our cyber security learning path.
- Surround yourself with a cohort of other early-career cyber experts.
- Be mentored by world-class cyber experts.

## What kind of work will you do?

- |                      |                         |                          |                         |
|----------------------|-------------------------|--------------------------|-------------------------|
| • Cyber Resilience   | • Risk Management       | • Digital Forensics      | • Insider Threat        |
| • Detect and Respond | • Frameworks            | • Security Automation    | • Policy and Government |
| • Mobile Security    | • Situational Awareness | • Security Architectures | • Privacy Engineering   |
| • Cloud Security     | • Threat Emulation      |                          |                         |

## What else do I need to know?

That MITRE values your work-life balance by offering 21 days of paid-time off plus flexible work schedule, civic time, sabbaticals and parental leave. In addition, you will enjoy such benefits as our generous retirement matching, education loan repayment program, educational assistance programs, the MITRE Institute, and more.
