

TEXAS AIRSYSTEMS

Texas AirSystems is the largest independent HVAC Equipment and Solutions provider in Texas. Our company has grown to five offices and over 280 employees throughout Texas, with headquarters in Irving, next to the DFW airport. We are proud members of ASA, ASHRAE, BOMA, CEF, TEXO & USGBC. We represent over 30 manufacturers, offering innovative systems with a flexibility of equipment and solutions to best match each application. We work with industry professionals and end users from the conceptual stage of projects to provide energy efficient, value-added solutions to their complex problems. Our sales professionals offer technical expertise and application experience in the design, construction, commissioning, and operation of building mechanical systems.

Our overall mission is simple: we want to create value and make a difference every day in our journey to be the best HVAC sales and service organization in North America. We believe we can succeed in that mission by being the BEST provider for our clients, the BEST partner for manufacturers, the BEST company for our employees, and the BEST investment for our current and future shareholders.

We have created an exceptional work environment that combines hard-charging results with enterprising spirit. We don't do things simply because it is how it was done in the past. We constantly strive to push beyond common practices to find new ways to grow and succeed. As you get to know the folks at Texas AirSystems, you'll discover a group of world-class employees who treat each other with respect, succeed with integrity and have a lifelong passion for learning.

Our values define who we are, underscore our commitment to clients and manufacturers, and provide direction for everything we do.

Texas AirSystems has been recognized for outstanding performance by its partners and for its commitment to its workforce by the Dallas Business Journal and the Cox School of Business.
