Increase your commitment
to improving the business within which you work.

Can lead to better job opportunities
and improved salary.

Become a change agent
within your organization, leading efforts to improve processes and the quality of what is delivered to customers.

TRAINING & CERTIFICATION

In this current uncertain global economic environment, companies are looking for a more systematic and pragmatic approach to deliver operational cost savings versus the fundamental management of costly major capital projects. This course will train you as an expert in diagnostics and the reduction in total cost of ownership. You will become a leader in your field for delivering enterprise level business solutions.

Learning Objectives

At the end of the workshop, participants will:

Have a comprehensive understanding and practical knowledge of the BPR/LSS methodology within the framework of DMAIC and the knowledge as to why it is relevant to business process improvement. The team will be equipped with the methodology and a holistic core of tools needed to identify, prioritize, and solve business problems within the functional and departmental boundaries from an enterprise perspective. Participants will work through the steps with a pre-selected project in their area of work.

Course & Certification Fee - $2500

Includes breakfast refreshments, lunch, and books.

INSTRUCTOR:
CEO, LATOYA BULLARD-FRANKLIN, MPM
MASTER BLACKBELT
