Timesheet Overview - Simple Work Events

The Work Events sub-tab of the Timesheet Overview screen displays a list of days in covered during the Timesheet's period and the hours associated with each day in the various categories of time.

Concepts

The hours recorded against the Timesheet are displayed in a format similar to that in which they were entered. No changes can be made using this screen.

Timesheets that consist of multiple work weeks will show multiple weeks of data on the same screen. To view a work week not shown on the screen, simply scroll your browser down until the next work week is visible.
