"Societal Challenges and Nutritional Security"

UNITED STATES DEPARTMENT
OF AGRICULTURE

Director of the National Institute
of Food and Agriculture

DATE: 7.21.16

TIME: 10:30-12 PM

SEMINAR | Q&A TOPICS

As the United States moves toward a global economy, the goals of agricultural science have broadened to include increasing food security through development of sustainable food production systems. Food security - ensuring that people have consistent access to quality food - is dependent of individuals and organizations working together to develop solutions to related economic and social issues.
