

The Center for Applied Statistics and Research

Behind the Numbers!

The power of descriptive statistics for informing equity and justice in education research.

The **Center for Applied Statistic and Research (CASR)** at Prairie View A&M University will host a series of workshops to build expertise among graduate students and faculty to employ statistical models and methods. The first workshop, *Behind the Numbers* features an analysis of the education gap among Black and Latino students in one of wealthiest counties in the US.

Dr. Marlon C. James an Assistant Professor in Multicultural Education at Texas A&M University and a Research Fellow in the CASR will introduce a straight forward method for interpreting descriptive statistics through visualizations and an interpretive guide called the Panther Way. Participants will practice using the Panther Way to uncover patterns of racial inequity using eight years of high school transcript data.

Lunch Time Session

Date: Wednesday September 29th

Time: Noon - 1 PM

Place: Texas A&M University Harrington Towers 347

Zoom Virtual Meeting to register scan the barcode

Evening Session

Date: Wednesday September 29th

Time: 6PM - 7 PM

Place: Zoom Virtual Meeting to register scan the barcode
