PRAIRIE VIEW A & M UNIVERSITY
COLLEGE OF ENGINEERING
Roy G. Perry College of Engineering
Department of Chemical Engineering

COURSE SYLLABUS
CHEG 4103 – Special Topics in Chemical Engineering:
Biological Transport Phenomena and Biomedical Engineering
Spring 2020

Instructor: Dr. Kazeem B. Olanrewaju
Claude L. Wilson Building, Room 201 C
Phone: (936) 261-9415; cell: 319-594-1861
E-mail: kaolanrewaju@pvamu.edu; olakab@gmail.com

Class
Meeting Time: TR 12:30 – 1:50 p.m.
Location: Gilchrist Engineering Building RM 104
Office Hours: Rm 201C, MW: 1pm – 2pm; R: 4pm-5 pm
Prerequisites:

Textbook: Transport in Biological Systems, George.A.Truskey; Fan Yuan;
-156988-1 or ISBN:1 0 0-13-156 988-0

Course Description: Introduction to human physiological to better understand the concepts of biological transport and physiological fluid mechanics. Fundamentals and applications of mass transport in biological systems and effect of mass transport upon biochemical interactions will be presented. Transport in organs and energy and bioheat transport will be taught. Biomedical devices, artificial kidney devices, artificial hearts, heart valves and Heart –Lung Machines (Oxygenators) will be studied.

Course Goals: This course will expose students to the application of Chemical Engineering concepts to human physiological system and also provide insight on how these concepts can help in diagnosing and offer therapeutic suggestions to range of pathological conditions.

* See textbook policy elsewhere in this syllabus.

University Rules and Procedures

Disability statement (See Student Handbook):
Students with disabilities, including learning disabilities, who wish to request accommodations in class
should register with the Services for Students with Disabilities (SSD) early in the semester so that
appropriate arrangements may be made. In accordance with federal laws, a student requesting
special accommodations must provide documentation of their disability to the SSD coordinator.

Academic misconduct (See Student Handbook):
You are expected to practice academic honesty in every aspect of this course and all other courses.
Make sure you are familiar with your Student Handbook, especially the section on academic
misconduct. Students who engage in academic misconduct are subject to university disciplinary
procedures. Calculators are limited to basic scientific and graphing functions for exams and quizzes
(those with USB or other data exchange port are prohibited).

Forms of academic dishonesty:
1. Cheating: deception in which a student misrepresents that he/she has mastered
   information on an academic exercise that he/she has not mastered; giving or receiving aid
   unauthorized by the instructor on assignments or examinations.
2. Academic misconduct: tampering with grades or taking part in obtaining or distributing any
   part of a scheduled test.
3. Fabrication: use of invented information or falsified research.
4. Plagiarism: unacknowledged quotation and/or paraphrase of someone else’s words, ideas,
   or data as one’s own in work submitted for credit. Failure to identify information or essays
   from the Internet and submitting them as one’s own work also constitutes plagiarism.
5. Use or possession of textbook solution manual. Since these are restricted by the copyright
   holder to teaching faculty only who are then prohibited from sharing with students, there is
   no legitimate way for a student to have a copy of the solution manual.

Nonacademic misconduct (See Student Handbook)
The university respects the rights of instructors to teach and students to learn. Maintenance of these
rights requires campus conditions that do not impede their exercise. Campus behavior that interferes
with either (1) the instructor’s ability to conduct the class, (2) the inability of other students to profit
from the instructional program, or (3) campus behavior that interferes with the rights of others will not
be tolerated. An individual engaging in such disruptive behavior may be subject to disciplinary action.
Such incidents will be adjudicated by the Dean of Students under nonacademic procedures.

Sexual misconduct (See Student Handbook):
Sexual harassment of students and employers at Prairie View A&M University is unacceptable and will
not be tolerated. Any member of the university community violating this policy will be subject to
disciplinary action.
Attendance Policy:
Prairie View A&M University requires regular class attendance. Excessive absences will result in lowered grades. Excessive absenteeism, whether excused or unexcused, may result in a student’s course grade being reduced or in assignment of a grade of “F”. Absences are accumulated beginning with the first day of class.

Student Academic Appeals Process
Authority and responsibility for assigning grades to students rests with the faculty. However, in those instances where students believe that miscommunication, errors, or unfairness of any kind may have adversely affected the instructor’s assessment of their academic performance, the student has a right
to appeal by the procedure listed in the Undergraduate Catalog and by doing so within thirty days of receiving the grade or experiencing any other problematic academic event that prompted the complaint.

**Grading Policy:**

The overall grade will be calculated based on attendance, homework/project work, quiz/test/midterm, final exam. Homework will be given and will be graded. It is up to the student to make best use of Homworks, which are designed to prepare for exams/test.

<table>
<thead>
<tr>
<th>Grade Element</th>
<th>Weight</th>
<th>Actual</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quiz/Attendance</td>
<td>10%</td>
<td></td>
</tr>
<tr>
<td>Homework/Project</td>
<td>40%-50%</td>
<td></td>
</tr>
<tr>
<td>Test/Midterm Exams</td>
<td>10%-15%</td>
<td></td>
</tr>
<tr>
<td>Final Exam/Project</td>
<td>25%-30%</td>
<td></td>

<td>100%</td>
<td></td>
</tr>
<tr>
<td>Extra Credit4</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>Adjusted Grade</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. The Actual column may be used to record your grade elements and your overall grade (calculate as a weighted sum of the elements).
2. At least one project will be assigned, which will probably be team-based.
3. The attendance policy notwithstanding, the overall grade is subject to be discounted up to 10% for lack of (1) attendance, (2) punctuality, or (3) participation.
4. Extra credit assignments may be applicable to this course and would consist of extra writing assignments and/or oral presentations. Discuss with instructor.

Letter grades will be assigned based on the numeric value of the adjusted grade (above) using a scale similar to the one below:

- **A** 90-100%
- **B** 80-89%
- **C** 70-79%
- **D** 60-69%
- **F** 00-59%

**Conduct:**

Students will conduct themselves in a manner that is respectful to his/her fellow classmates and the instructor at all times.
