

**PRAIRIE VIEW A&M UNIVERSITY  
COLLEGE OF ENGINEERING**

**COURSE SYLLABUS  
CHEG 3156 – Chemical Engineering Internship II**

**TIME:** Practicuum (No Formal Class Meetings) \*

**Credit Hour:** 6

**DESCRIPTION:** Chemical Engineering Internship II. (0, 0) Credit 6 semester hours. This course is an internship program of work experience with an approved engineering firm. Prerequisite: CHEG 2156 and consent of advisor.

**PREQUISITE:** Consent of instructor and research advisor employment as an engineering intern during the semester enrolled.

**INSTRUCTOR** Dr. Irvin W. Osborne-Lee  
Professor of Chemical Engineering  
Wilson 200A  
Phone (936) 261-9400  
Email: [oslee@pvamu.edu](mailto:oslee@pvamu.edu)

**OFFICE HOURS:** Office hours MTWR 8:00-9:30 a.m.

**TEXTBOOK:** None.

**REQUIREMENTS:** Course requirements are as follow:

- 1) Submit offer letter before enrolling or during first week of class.
- 2) Submit an internship Data Sheet within the first week of the semester.
- 3) Submit supervisor's evaluation and a report that describes the internship experience by July 30 (Summer), November 30 (Fall), or April 30 (Spring).
- 4) Prepare and submit an oral presentation (YouTube style) as a digital file upload by due date for item 3) above. For files too large to upload to eCourses, upload (to eCourses) a link to a shared drive such as DropBox. Do not send me video files by email.

**GOALS:** To provide practical professional experience to reinforce what is learned during the undergraduate degree program.

\* This course is a practicum that appears on the student's transcript and affects the student's grade point average, but does not satisfy any degree requirements. It is part of a 2 course series that may be repeated as often as the student is engaged in an internship. The actual meeting times are variable as arranged each week between student and instructor.

## SUPERVISOR'S EVALUATION OF INTERNSHIP STUDENT

**INSTRUCTIONS:** The immediate supervisor will evaluate the student objectively, comparing him/her with other students of comparable academic level, with other personnel assigned the same or similarly classified jobs, or with individual standards.

Please return the evaluation to the Associate Dean of Engineering by July 30 for the Summer Semester, November 30 for the Fall Semester, or April 30 for the SUMMER Semester by FAX:

To: Dr. Irvin W. Osborne-Lee  
Fax No: (936) 261-9419  
Email: oslee@pvamu.edu

Student's Name \_\_\_\_\_ Work Period: \_\_\_\_\_

Brief Job Description: \_\_\_\_\_

Employer: \_\_\_\_\_

Location: \_\_\_\_\_

### STUDENT'S PERFORMANCE ON:

#### Ability to Learn

- Excellent
- Above average
- Average
- Below average
- Very Slow

#### Attitude-Application to Work

- Outstanding in enthusiasm
- Very interested & industrious
- Average diligence & interest
- Somewhat indifferent
- Definitely not interested

#### Dependability

- Completely dependable
- Above average
- Usually dependable
- Sometime neglectful/careless
- Unreliable

#### Quality of Work

- Excellent
- Very good
- Average
- Below Average
- Very poor

This report has been discussed with the Student  yes  no.

## REPORT PREPARATION GUIDELINES

Below is guidance that you, as a student enrolled in a co-op or internship course, should use in preparing the report that will be submitted at or near the end of your work engagement.

- 1) Please remember that you should make your report be reflective of the grade that you would like to receive, in both content and appearance. You should not expect an excellent grade for mediocre or even average work.
- 2) Your report should be well organized, including the following components.
  - a) Title Page, including your name, the course number and name, the semester enrolled, the instructor's name, and the date of submission.
  - b) Introduction, explaining the reason for the report, giving any necessary background information, and giving a brief overview of the report.
  - c) Description of the Work Engagement, including such details as the following.
    - i) The company or agency providing the employment.
    - ii) The location or site of the work engagement, and how it relates to the company as a whole.
    - iii) The organization in which the job is positioned, and where in the organizational scheme of the company it falls.
    - iv) The person supervising the intern/co-op student, their job title, areas of responsibility, and how they fit into the organization chart of the company.
    - v) Your job title, position description, and task assignments given and/or completed during the work engagement.
  - d) Summary of Accomplishments and Educational Benefits, describing such outcomes as follow.
    - i) How the work engagement relates to your field of study.
    - ii) Your accomplishments from your work engagement, such as tasks completed, goals attained, milestones successfully achieved.
    - iii) The ways in which the experiences are/have been beneficial to your education.
  - e) Conclusions, or Lessons Learned and Recommendations for the Future, indicating what plans you would make or new goals you would set after having this work experience, such as whether you would like to work another assignment such as this one, or seek a different type of experience based on what you have just learned, and any advice you might give to a future intern following behind you.
  - f) References, if you are making any citations of previously published works, whether in the published literature or company internal documents.
  - g) Acknowledgements, where you express your gratitude for your sponsors, mentors, and anyone else you deem deserving. For example, you may want to thank the company that hired you, those company employees who gave you personal guidance and assistance, your mentor (if any) whether or not they work for your employer, etc.
- 3) You may use equations, tables and figures to help illustrate your points and show your accomplishments. Remember that such objects should not be simply inserted into (or attached to) your report, but each table and figure should be properly captioned, called out by name just prior to its appearance in the report, and used in discussion somewhere near its appearance.
- 4) The length of reports will vary. However, if you give careful attention to each of the bulleted items on this page, you will not likely end with a report of less than 5 pages. There should be no need for the report to run more than about 15 pages. Choose your figures of merit (tables, graphs, photos, etc.) carefully and selectively; do not think that padding your report with extra pages will improve the quality of the report (or your grade).
- 5) A final point. If you want "free marks" on your report prior to its official submission, then email me a soft copy and I will review it and send it back to you with suggestions for improvement. This review (as is done in industry) will help improve the quality of your report and will likely have a nice effect on your grade.
