

<b>Math 2024– Calculus with Analytic Geometry II P01-Summer 2016</b>			
<b>Department of</b>	<b>Mathematics</b>	<b>College of</b>	<b>Arts and Sciences</b>
<b>Instructor Name:</b>	<i>Manouchehr Misaghian, PhD</i>		
<b>Office Location:</b>	<i>Banks, 302 F</i>		
<b>Office Phone:</b>	<i>936-261-2090</i>		
<b>Fax:</b>	<i>936 261-2088</i>		
<b>Email Address:</b>	<a href="mailto:mamisaghian@pvamu.edu">mamisaghian@pvamu.edu</a>		
<b>Snail Mail (U.S. Postal Service) Address:</b>		Prairie View A&M University	
		P.O. Box	519
		Mail Stop	<b>2225</b>
		Prairie View, TX 77446	
<b>Office Hours:</b>	By appointment		
<b>Virtual Office Hours:</b>	<b>None</b>		
<b>Course Location:</b>	Hobart Thomas Taylor Sr Hall 1E146		
<b>Class Meeting Days &amp; Times:</b>	<b>MTWR:1:00-4:10 PM</b>		
<b>Course Abbreviation and Number:</b>	Math 2024		
<b>Catalog Description:</b>	Credit 4 semester hours. Applications of integrals, integration techniques, inverse functions, indeterminate forms, improper integrals, parametric equations, polar coordinates, infinite series, power series, Taylor series.		
<b>Prerequisites:</b>	Math 1124 or equivalent		
<b>Co-requisites:</b>			
<b>Required Text:</b>	<b>Calculus, By Ron Larson and Bruce H. Edwards 10th edition</b> <b>ISBN13: 978-1-285-05709-5</b>		
<b>Recommended Text:</b>	Calculus, 7 <sup>th</sup> edition, by James Stewart, Brooks Cole Publishing Company ISBN-13: 978-0-538-49781-7;. The following site will be used for course assignments:		
<b>Access to Learning Resources:</b>	PVAMU Library: phone: (936) 261-1500; web: <a href="http://www.tamu.edu/pvamu/library/">http://www.tamu.edu/pvamu/library/</a> University Bookstore: phone: (936) 261-1990; web: <a href="https://www.bkstr.com/Home/10001-10734-1?demoKey=d">https://www.bkstr.com/Home/10001-10734-1?demoKey=d</a>  <a href="https://www.webassign.net/login.html?message=ended">https://www.webassign.net/login.html?message=ended</a>		
<b>Course Goals or Overview:</b>			
	The goal of this course is to provide a solid foundation of different integration techniques, and infinite series and to show how the basic concepts of calculus can be applied to solving a variety of scientific and applied problems		
<b>At the end of this course, the student will be able to</b>			
		Alignment with Academic Program	Alignment with Core Curriculum
1	show mastery in the differential and integral techniques to deal with functions of a single variable; use a variety of techniques to integrate more complex integrals	#1, #4	#2
2	apply integral calculus to solving a variety of scientific and applied problems	#2, #4	#2, #3
3	understand the concept and applications of inverse functions	#1, #4	
4	understand parametric equations of curves and equations of curves in polar coordinates; find derivatives of and tangents to parametric and polar curves	#1	#2, #3
5	analyze sequences and series; find the interval of convergence of a power series; find Taylor or Maclaurin series for a function and solve related applied problems;	#1, #2	#3, #6

	use power series to find derivatives and integrals and to solve other applied problems		
6	apply calculus to solve selected problems that arise in mathematics, science, engineering, computer science, business, and economics	#2, #3	#2, #3, #5

### Course Evaluation Methods

This course will utilize the following instruments to determine student grades and proficiency of the learning outcomes for the course.

**Exams** – written tests designed to measure knowledge of presented course material

**Exercises** – written assignments designed to supplement and reinforce course material

**Assignments** – web development assignments designed to measure ability to apply presented course material

**Class Participation** – daily attendance and participation in class discussions.

**Exams Format.** All tests and Exams. are in open-ended (Free response) format. Final and Mid. Term Exams are common and will be Witten by Math. Department.

**Homework/other assignments** – to be done using WebAssign to enhance the understanding of the material. Go to <http://www.webassign.net/login.html> to register.

**The Class Key is:**

### Grading Matrix

Instrument	Value (points or percentages)	Total
Assignments	10 assignments at 10 points each	100
Tests	2 Tests at 50 points each	100
Mid Term Exam	60	60
Class Participation/ Discussion	20	20
Final Exam	100	120
<b>Total:</b>		<b>400</b>

#### Grade Determination:

A = 400 – 380pts;

B = 379 – 320pts;

C = 319 – 280pts;

D = 279 – 220pts;

F = 219pts or below

### Course Procedures

#### Submission of Assignments:

#### Formatting Documents:

Microsoft Word is the standard word processing tool used at PVAMU. If you're using other word processors, be sure to use the "save as" tool and save the document in either the Microsoft Word, Rich-Text, or plain text format.

#### Exam Policy

Exams should be taken as scheduled. No makeup examinations will be allowed except under documented emergencies (See Student Handbook).

### Professional Organizations and Journals

Calculus of Variations and Partial Differential Equations

### References

## University Rules and Procedures

#### Disability statement (See Student Handbook):

Students with disabilities, including learning disabilities, who wish to request accommodations in class should register with the Services for Students with Disabilities (SSD) early in the semester so that appropriate arrangements may be made. In accordance with federal laws, a student requesting special accommodations must provide documentation of their disability to the SSD coordinator.

#### Academic misconduct (See Student Handbook):

You are expected to practice academic honesty in every aspect of this course and all other courses. Make sure you are familiar with your Student Handbook, especially the section on academic misconduct. Students who engage in academic misconduct are subject to university disciplinary procedures.

#### Forms of academic dishonesty:

1. Cheating: deception in which a student misrepresents that he/she has mastered information on an academic exercise that he/she has not mastered; giving or receiving aid unauthorized by the instructor on assignments or

- examinations.
2. Academic misconduct: tampering with grades or taking part in obtaining or distributing any part of a scheduled test.
  3. Fabrication: use of invented information or falsified research.
  4. Plagiarism: unacknowledged quotation and/or paraphrase of someone else's words, ideas, or data as one's own in work submitted for credit. Failure to identify information or essays from the Internet and submitting them as one's own work also constitutes plagiarism.

#### **Nonacademic misconduct (See Student Handbook)**

The university respects the rights of instructors to teach and students to learn. Maintenance of these rights requires campus conditions that do not impede their exercise. Campus behavior that interferes with either (1) the instructor's ability to conduct the class, (2) the inability of other students to profit from the instructional program, or (3) campus behavior that interferes with the rights of others will not be tolerated. An individual engaging in such disruptive behavior may be subject to disciplinary action. Such incidents will be adjudicated by the Dean of Students under nonacademic procedures.

#### **Sexual misconduct (See Student Handbook):**

Sexual harassment of students and employers at Prairie View A&M University is unacceptable and will not be tolerated. Any member of the university community violating this policy will be subject to disciplinary action.

#### **Attendance Policy:**

Prairie View A&M University requires regular class attendance. Excessive absences will result in lowered grades. Excessive absenteeism, whether excused or unexcused, may result in a student's course grade being reduced or in assignment of a grade of "F". Absences are accumulated beginning with the first day of class.

#### **Student Academic Appeals Process**

Authority and responsibility for assigning grades to students rests with the faculty. However, in those instances where students believe that miscommunication, errors, or unfairness of any kind may have adversely affected the instructor's assessment of their academic performance, the student has a right to appeal by the procedure listed in the Undergraduate Catalog and by doing so within thirty days of receiving the grade or experiencing any other problematic academic event that prompted the complaint.

## **Technical Considerations for Online and Web-Assist Courses**

#### **Minimum Hardware and Software Requirements:**

- Pentium with Windows XP or PowerMac with OS 9
- 56K modem or network access
- Internet provider with SLIP or PPP
- 8X or greater CD-ROM
- 64MB RAM
- Hard drive with 40MB available space
- 15" monitor, 800x600, color or 16 bit
- Sound card w/speakers
- Microphone and recording software
- Keyboard & mouse
- Netscape Communicator ver. 4.61 or Microsoft Internet Explorer ver. 5.0 /plug-ins
- Participants should have a basic proficiency of the following computer skills:
  - Sending and receiving email
  - A working knowledge of the Internet
  - Proficiency in Microsoft Word
  - Proficiency in the Acrobat PDF Reader
  - Basic knowledge of Windows or Mac O.S.

**Netiquette (online etiquette):** students are expected to participate in all discussions and virtual classroom chats when directed to do so. Students are to be respectful and courteous to others in the discussions. Foul or abusive language will not be tolerated. When referring to information from books, websites or articles, please use APA standards to reference sources.

**Technical Support:** Students should call the Prairie View A&M University Helpdesk at 936-261-2525 for technical issues with accessing your online course. The helpdesk is available 24 hours a day/7 days a week. For other technical questions regarding your online course, call the Office of Distance Learning at 936-261-3290 or 936-261-3282

#### **Communication Expectations and Standards:**

All emails or discussion postings will receive a response from the instructor within 48 hours.

You can send email anytime that is convenient to you, but I check my email messages continuously during the day throughout the work-week (Monday through Friday). I will respond to email messages during the work-week by the close of business (5:00 pm) on the day following my receipt of them. Emails that I receive on Friday will be responded to by the close of business on the following Monday.

#### **Submission of Assignments:**

Assignments, Papers, Exercises, and Projects will be distributed and submitted through your online course. Directions for accessing your online course will be provided. Additional assistance can be obtained from the Office of Distance Learning.

**Discussion Requirement:**

Because this is an online course, there will be no required face to face meetings on campus. However, we will participate in conversations about the readings, lectures, materials, and other aspects of the course in a true seminar fashion. We will accomplish this by use of the discussion board.

Students are required to log-on to the course website often to participate in discussion. It is strongly advised that you check the discussion area daily to keep abreast of discussions. When a topic is posted, everyone is required to participate. The exact use of discussion will be determined by the instructor.

**It is strongly suggested** that students type their discussion postings in a word processing application and save it to their PC or a removable drive before posting to the discussion board. This is important for two reasons: 1) If for some reason your discussion responses are lost in your online course, you will have another copy; 2) Grammatical errors can be greatly minimized by the use of the spell-and-grammar check functions in word processing applications. Once the post(s) have been typed and corrected in the word processing application, it should be copied and pasted to the discussion board.

**Math 2024, Calculus II.  
COURSE OUTLINE, for regular semester.**

**For summer semester materials of each week is equal to 3 weeks of a regular semester**

Week	Topics	Note
<b>1</b>	Review of the Fundamental Theorem of Calculus, area and volume. <i>Sections 4.3, Area and volume 5.1, 5.2, 5.3</i>	
<b>2</b>	work, Sections 5.4, Inverse Functions: Exponential and Logarithmic and their derivatives. Sections 6.1, 6.2, 6.3, 6.4.	
<b>3</b>	Inverse trigonometric and hyperbolic functions. <i>Sections 6.6, 6.7. Indeterminate forms and L'Hospital's rule: Section 6.8.</i>	
<b>4 &amp; 5</b>	Techniques of Integration. Integration by substitution, by parts, trigonometric integrals, and trigonometric substitution. <i>Sections 7.1, 7.2, 7.3</i>	<b>First Exam</b>
<b>6 &amp; 7</b>	Integration of rational functions by Partial fractions; section 7.4, approximate integration section 7.7, Improper integrals: Section 7.8.	
<b>8</b>	Arc length, surface area of revolution, application to physics and engineering. <i>Sections 8.1, 8.2, 8.3.</i>	<b>Midterm Exam.</b>
<b>9</b>	Parametric equations and polar coordinates; sections 10.1, 10.2, 10.3	
<b>10</b>	Areas and lengths in polar coordinates. Section 10.4, sequences, 11.1, series 11.2	
<b>11</b>	Integral and comparison tests, other convergence tests. <i>Sections 11.3, 11.4, 11.6</i>	
<b>12</b>	Power series. Representations of functions as a power series. Taylor and Maclaurin series. <i>Sections 11.8, 11.9, 11.10</i>	<b>Third Exam</b>
<b>13</b>	<i>Functions of several variables, partial derivative and Chain rule; sections 14.1, 14.3, and 14.5</i>	

<b>14</b>	Double integrals: Fubini's Theorem, Double integrals in polar coordinates; sections 15.2, 15.3, and 15.4	
<b>15</b>	<b>Course review for Final Examination</b>
