

Kafil has over 29 years of global experience in architecture, including 21 years in the USA and 14 years as a registered architect in multiple US states.

He has worked on various project types, including healthcare, civic, educational, commercial, multi-family, and religious buildings. Before founding KJ Architects in January 2011, Kafil gained experience at several reputable architectural firms, progressing from intern architect to project manager. His responsibilities have encompassed schematic design, design development, construction documents, and construction administration. Some of his notable project experiences include:
