	Adjunct Assistant Professor	Prairie View A & M University	Sept 2015 – May 2017	
Additional Trainings/Skills:				
Private Practice	At my privately-owned practice I provide individual evidence-based treatment, rooted in Cognitive-Behavioral Theory, to individuals ages 12 and older to address the spectrum of DSM-5 diagnoses.			
	Provide weekly supervision to multiple Masters’-level and Post-Doctoral licenses using experiential techniques, research-based data, and clinical experience to augment the therapeutic interventions and psychological evaluations they provide.			
	Provide psychological assessments to augment the treatment or other services provided to clients in their academic, vocational, and interpersonal lives.			
	Conduct intellectual, academic achievement, objective and projective personality assessments and amalgamate the results to render both clinically sound diagnoses and effective recommendations.			
HCJPD	Directly responsible for supervising a juvenile outpatient program. Provide psychotherapy grounded in Cognitive Behavioral and Dialectical principles with specialized knowledge of substance abuse.			
	Create, monitor, and mold treatment plans based on clinical needs, substance abuse and family history, feedback from an interdisciplinary treatment team and one on one meetings with clients.			
	Determine client (and family) needs and make appropriate and timely referrals to community-based agencies including substance abuse assessment and referrals for supportive, intensive outpatient, or residential treatment. Conduct full and abbreviated psychological evaluations: intelligence, academic, objective, and projective testing.			

	Provide weekly supervision, evaluation, and professional guidance to doctoral interns.
